How can I modify the regular expression above to get only the strings in between (keyword) and (/) in my results? A: You may use re.findall("(\\((STRING|WORD)\\)+(\\)|)", text) You may create the regex with another approach: pattern = r'\\(((STRING|WORD)\\)+(\\)|)' If the string to search does not contain a sub-expression, then parentheses group is not necessary: pattern = r'((STRING|WORD)\\|)' See the Python demo. Pattern details: \\( - a ( char (STRING|

It is the first installment in the Tropico series since the original Tropico in 1999 and the first since Limbic Entertainment acquired the series rights from Haemimont Game Studios. It was released for Microsoft Windows on April 23, 2012. The player-controlled island is managed and develops over a period of forty-five years, so that the player can experiment with a wide range of policies, and has the ability to increase the population and provide social services. The game also introduces a space management system, allowing the player to see the trajectory of asteroids, meteors and comets that impact the island. The player can also launch satellites into orbit to perform research and contact other players, or send and receive military operations. The game also features micro-transactions to 50b96ab0b6
